November 24, 2026

Mitsui Kinzoku Company, Limited

Notice Regarding Unauthorized Access to Our Corporate Website

Mitsui Kinzoku Company, Limited has confirmed that its corporate website (https://www.mitsui-kinzoku.com) was subject to unauthorized access from an external source.

We sincerely apologize for the inconvenience and concern this may have caused our customers and other stakeholders. At this time, we have found no evidence that any personal information, including contact details collected through our website, has been compromised.

1. Overview of the Incident

We confirmed that unauthorized external access to the server hosting our corporate website occurred between November 18 and 19, 2026.

In response, we temporarily suspended the website on November 20 to prevent any further potential impact and ensure the security of the website.

2. Status of the Investigation

We are currently investigating the scope and impact of the incident in cooperation with INFONET inc. (https://www.e-infonet.jp/), which manages the operation of our corporate website.

Our investigation to date has found no evidence that any personal information, including contact details collected through our website, has been compromised.

3. Resumption of the Website with Limited Functionality

To enable users to access our website safely, we have resumed operation of the website with certain functions restricted.

<Functions currently unavailable or partially unavailable>

- Inquiry forms, requests for materials, and other input forms
- Site search
- List filtering functions

We apologize for any inconvenience and appreciate your understanding.

4. Next Steps

We will continue to work with INFONET inc., the police, and other relevant authorities to determine the full scope and impact of the incident and take the necessary measures to ensure the security of the website.

Should any new information requiring disclosure become available, we will promptly provide an update on

this website. We will also announce when the currently restricted functions are expected to be fully restored once the schedule has been determined.
